RACs At-A-Glance Phase III: State Reporting Instructions

August 2016
Section 6411(c) of the Affordable Care Act and Section 1902(a)(42) of the Social Security Act require reporting on the effectiveness of State Medicaid RAC programs.

Medicaid RAC information reported to CMS by States will form the basis of CMS’ annual Report to Congress.

Medicaid RACs-At-A-Glance Phase III will enable State reporting and tracking of RAC program performance metrics gleaned from Medicaid RAC audits.

States will enter information representing a fixed time period—either quarterly or annual—report. For these instructions, it will be called a “period report.”

To add a new period report or update an already existing period report an amendment must be created from the original report.

When creating an amendment the system will automatically replicate data contained in the previously submitted report by the States.
